Arav Gulati

As a final-year B.Tech student specializing in Artificial Intelligence and Machine Learning, I have a strong foundation in AI-driven technologies and a passion for developing innovative solutions. My academic journey has equipped me with expertise in machine learning algorithms, neural networks, and data analysis. I am keen on leveraging my technical skills to contribute to cutting-edge AI projects and drive advancements in intelligent systems.

EDUCATION

Bachelors of Technology (AI-ML)
Guru Tegh Bahadur Institute of Technology

08/2021 - Present *GPA: 8.45*

Courses
- Artificial Intelligence and Machine Learning

Senior Secondary(XII)
Aadharshila Vidhyapeeth

04/2020 - 03/2021 *CBSE : 87%*

Courses
- Science

WORK EXPERIENCE

Artificial Intelligence Intern
CodeClause

11/2023 - 12/2023 *virtual*

Achievements/Tasks
- **Developed a real-time face detection system** using advanced computer vision techniques and deep learning models, enhancing the accuracy and efficiency of facial recognition processes.
- **Engineered a real-time facial emotion detection model** leveraging convolutional neural networks (CNNs) to classify and interpret human emotions, improving user interaction and experience in AI applications.
- **Optimized machine learning pipelines** for real-time data processing, ensuring swift and reliable performance in AI-driven systems.

Web Developer Intern
Coincent.ai

05/2023 - 08/2023 *virtual*

SKILLS

Python | Artificial Intelligence | Machine Learning | Deep Learning | MySql | Java | NLP | HTML | CSS | GPT-4 | OPT

PERSONAL PROJECTS

Sentiment Analysis (07/2022 - 08/2022)
- **Implemented a sentiment analysis model** using Natural Language Processing (NLP) techniques to classify blog content as positive, neutral, or negative, improving content understanding and categorization.
- **Utilized text preprocessing methods** such as tokenization, stemming, and stop-word removal to prepare large datasets for sentiment analysis, enhancing model accuracy.
- **Applied machine learning algorithms** like Naive Bayes and SVM for sentiment classification, optimizing performance and predictive capabilities.

Autism Detection (08/2024 - Present)
- **Designing a machine learning model** tailored to detect Autism Spectrum Disorder (ASD) in children, utilizing behavioral and clinical data for early and accurate diagnosis.
- **mplementing feature extraction techniques** to identify key indicators of ASD, enhancing the model's predictive accuracy and robustness.
- **Exploring various classification algorithms** to optimize the detection process, ensuring reliable differentiation between children with and without ASD.

CERTIFICATES

Sensors and Simulators for UAS (09/2023 - 09/2023)
Completed a 5-day bootcamp on "Sensors and Simulators for UAS" by the Center for Development of Advanced Computing.

Data Structures and Algorithms(Geeks for Geeks) (08/2024 - Present)
Enrolled in a 16-week DSA course from Geeks for Geeks.

INTERESTS

Volleyball | Playing Guitar
