Hand Gesture Recognition model is a Computer Vision project. The model is trained to learn to identify hand gestures from images. Conventional Neural Network is used to train and evaluate the dataset, obtained from Kaggle.

### Emotion Detection

Apr 2024 - Apr 2024

https://github.com/Mish13Suyash/Emotion-Detection

This model takes input facial images and detects the emotion of the human. The Python libraries used are:Keras, convolution neural network, Numpy, Pandas, Matplotlib, Scikit-learn and tkinter

### Digit Analysis

Mar 2024 - Mar 2024

https://github.com/Mish13Suyash/Digit-Analysis

This model analyses the handwritten text with an accuracy as high as 98%. It is trained using PyTorch and CNN.

### Sales Forecast

Jun 2023 - Jun 2023

https://github.com/Mish13Suyash/Sales-Forecast

It is a supervised learning project. This project aims to predict future sales trends, optimize resource allocation, and drive strategic decision-making. A linear regression model is used. Further, the prediction is visualised using Matplotlib and seaborn
