EDUCATION

Guru Tegh Bahadur Institute of Technology , New Delhi Sep 2021 - Present
B.Tech in Artificial Intelligence and Data Science CGPA: 9.27

St. Thomas' School , Mandir Marg, New Delhi Apr 2014 - May 2021
High school (Science Stream) CGPA: 9.54

SKILLS

Functional: Data Analysis, Data Cleaning, Data Preprocessing, Project Planning, PowerPoint Presentation, Communication, Research and Evaluation

Technical: Python, Java, SQL, Machine Learning, Deep Learning, Statistical Analysis, Data Visualization, Natural Language Processing (NLP), Web Scraping, Data Engineering, Sentiment Analysis

Tools & Libraries: Pandas, NumPy, BeautifulSoup, Scikit-learn, TensorFlow, NLTK, TextBlob, VADER (Sentiment Analysis), Matplotlib, Seaborn, OpenCV, MediaPipe, Excel, Tableau, Power BI

PROFESSIONAL EXPERIENCE

Chalk Digital - Delhi, India Aug 2023 - Sep 2023
Data Science Intern

- Designed an ad-click prediction model, increasing ad targeting efficiency by 12%.
- Analyzed 1M+ ad impressions, uncovering actionable insights to optimize advertising strategies.
- Collaborated with cross-functional teams, improving operational KPIs and business outcomes.
- Communicated results via structured presentations, accelerating leadership decision-making by 25%.

Chalk Digital - Delhi, India Jul 2024 - Sep 2024

Data Science Intern

- Developed machine learning models analyzing 50,000+ data points for house price prediction, achieving 79.5% accuracy using Random Forest Regressor.
- Conducted feature analysis, identifying 10+ key factors influencing property prices and improving accuracy by 32%.
- Cleaned and preprocessed large datasets, ensuring high-quality inputs for model training.
- Presented findings through weekly reports, enabling data-driven decision-making for stakeholders.

PROJECTS

Gesture-Based Sound Control using Python Feb 2022 - Mar 2022

- Built a Python-based sound control system achieving 95% accuracy in detecting hand gestures with OpenCV and MediaPipe.
- Improved user interaction efficiency by reducing response time to 1.5 seconds.
- Tools and Technologies: Python, OpenCV(cv2) , Mediapipe, Sympy, Ctypes, Math, Pycaw, Comtypes.

Customer Segmentation using Hierarchical Clustering Apr 2022 - May 2022

- Devised a customer segmentation model using hierarchical clustering, grouping 5,000+ customers into targeted segments.
- Enhanced marketing efficiency by implementing personalized strategies, resulting in a 10% increase in customer engagement.
- Tools and Technologies: Python, Pandas, Numpy, Matplotlib, Scipy.cluster.hierarchy, Scikit-learn.

Data-Driven Analysis and Predictive Modeling for Real Estate Investment Optimization Oct 2023 - Dec 2023

- Built predictive models (Ridge, Lasso, Random Forest), improving property valuation accuracy by 10%.
- Optimized model performance by 15% through hyperparameter tuning using GridSearchCV and cross-validation techniques.
- Analyzed 10,000+ records, delivering insights for faster investment decisions.
- Tools and Technologies: Python, Pandas, Seaborn, Scikit-learn, GridSearchCV, Ridge Regression, Lasso Regression.

Text Analysis and Sentiment Scoring Pipeline Oct 2024 - Nov 2024

- Engineered a pipeline to extract and analyze textual data from 100+ articles using BeautifulSoup, NLTK, and TextBlob.
- Executed sentiment scoring with 95% accuracy, utilizing VADER and advanced lexicons.
- Generated detailed Excel reports consolidating 8+ readability metrics like FOG Index and complexity word ratios.
- Tools and Technologies: Python, BeautifulSoup, NLTK, TextBlob, Pandas, Excel, VADER Sentiment Analyzer.
