SKILLS

Programming Languages: Python, HTML, CSS.
Machine Learning and Deep Learning : Python (eg. scikit-learn, numpy, pandas, matplotlib, plotly, seaborn), Tensorflow, Pytorch, Open CV, Hugging Face, Langchain.
Data Science & Miscellaneous Technologies: SQL, Hypothesis testing, data visualization, modeling, Statistics, Excel, Tableau, data analysis.

PROJECTS

Goodreads: Data Analysis and Recommender System (Click Here)

- **Description:** Conducted data analytics on the Goodreads dataset to gather insights into favorate books. Conducted Exploratory Data Analysis (EDA) to identify trends and patterns. Used elbow curve method to deterine number of clusters. Identified outliners to optimize k-means clustering and make a reccomender system for books.
- **Skills Utilized:** Exploratory Data Analysis (EDA) | Data Visualization | K-Means.

Traffic Sign Recognition (Click Here)

- **Description:** Created a CNN model to recognise trafffic signs with almost 100% test accuracy. Trained the model on MPS device and made the code memory efficient. After the model training, visualized the training history, plotted the training history and calculated classification metrics. Created a prediction function and predicted on some random choosed images.
- **Skills Utilized:** PyTorch | CNN | Normalization | Model Testing | Numpy | Pandas.
