KRITIKA JOSHI

New-Delhi, India
7217852067 kritikajoshi004@gmail.com https://www.linkedin.com/in/kritika-joshi-b04723238/

Education

Guru Tegh Bahadur Institute Of Technology **June. 2021 – June 2025**
Bachelor of Technology(Artificial intelligence and Data Science) *8.1 GPA*

Relevant Coursework

- Data Structures
- Prompt Engineering
- NLP
- Deep Learning
- Artificial Intelligence
- DBMS
- Power Bi
- Data Science

Experience

Pianalytics **OCT 2023 – NOV 2023**
Data Science (Intern) *Remote*

- **Data Collection and Cleaning**: Extracted and preprocessed large datasets from various sources (SQL databases, APIs, CSV files). .
- **Exploratory Data Analysis (EDA)**: Performed statistical analysis and visualized trends using Python libraries like Pandas, Matplotlib, and Seaborn.
- **Machine Learning Model Development**: Assisted in building machine learning models (regression, classification) using Scikit-learn to predict target variables.
- **Data Visualization**: Created dashboards and reports using tools like Tableau, Power BI, and Matplotlib to communicate insights to non-technical stakeholders.

Outlier **Jan 2024 – June 2024**
Prompt Engineer (freelancer) *Remote*

- **Custom Prompt Creation**: Developed, tested, and optimized advanced prompts for large language models (GPT, OpenAI, etc.) to solve various client-specific challenges, including content generation, data extraction, and automation.
- **Fine-Tuning**: Collaborated with clients to fine-tune prompt engineering processes for AI models, ensuring outputs were contextually accurate and aligned with project goals .
- **Training and Documentation**: Provided training and comprehensive documentation to clients, explaining how to modify and deploy prompt workflows for future use.

Projects

Retrieval-Augmented Generation (RAG) Model Project | *(Python, PyTorch, GPT, Flask)* **August 2024**

- Built a Retrieval-Augmented Generation (RAG) model to extract information from PDF documents and generate accurate answers to user questions.
- Used libraries like PyPDF2 and PDFMiner to extract text data from large PDF documents and convert it into a searchable format..
- Developed a user-friendly interface with Flask, allowing users to upload PDFs and receive real-time answers to their questions.

Object Detection Project | *(Python, OpenCV, Pytorch, Flask)* **November 2023**

- Built and trained an object detection model and classify objects in images and videos with high accuracy
- Labeled and prepared a custom dataset, applying techniques like augmentation to improve model robustness
- Deployed the model using OpenCV and Flask for real-time object detection in a user-friendly interface

Skills

Languages and DataBases : Python, Pandas, Numpy, SQL, MySQL, Tensorflow, Keras
Visualization Tools: Tableau, Power BI
Other Skills : Advanced Excel, Business Analysis, Data Analysis, Communication skill
Languages : English, Hindi

Certification

NLP(Natural Language Processing) **(1- Aug – 15- Sep)**
Internshala

∗ Gained hands-on experience with NLP techniques, including text preprocessing, tokenization, and named entity recognition (NER).
∗ Worked with deep learning models for NLP using frameworks such as TensorFlow and Hugging Face.
∗ Completed real-world projects to extract insights from large text datasets.

Python Development **(28- Aug – 20- Sep)**
Infosys

· Developed and optimized web applications using frameworks like Django and Flask
· Gained proficiency in database integration (SQL, NoSQL) and API development.
· Completed hands-on projects, such as automating tasks, building RESTful APIs, and deploying applications.
