Khadija Baig

AI Software Engineer | Full-Stack Developer

New Delhi
Phone No. 9718396899
engg.khadija@gmail.com
https://www.linkedin.com/in/khadija-baig-6805a0226/

Enthusiastic AI/ML specialist with a strong foundation in developing ethical, secure, and sustainable AI solutions. Adept in full-stack development with hands-on experience in Python and skilled in deploying AI models. With a strong foundation in Python, data science, and deep learning frameworks such as TensorFlow and PyTorch, I have developed innovative solutions in natural language processing, computer vision, and predictive analytics. An eager learner with a deep interest in exploring the intersection of technology and design. Seeking opportunities to contribute to cutting-edge projects while enhancing skills in both technical and design domains. I thrive in collaborative environments and am committed to continuous learning and delivering impactful AI solutions that drive digital transformation. Driven by a commitment to innovation, particularly in integrating AI into enterprise solutions.

Education

B.Tech in Artificial Intelligence and Machine Learning
Guru Tegh Bahadur Institute of Technology (GTBIT), GGSIPU
2022 - 2025 (Expected)
Overall Score: 8 CGPA (current score)

Diploma in Computer Science
Kasturba Institute of Technology
2019 - 2022
Score: 84%

Experience

Data Science Intern – *CodeClause*

Applied data science techniques including exploratory data analysis (EDA) , statistical analysis, and supervised regression modeling. Utilized machine learning algorithms, including Linear and Random Forest Regression, optimizing with GridSearchCV.

Python Programming Intern- *Codsoft*

Managed multiple projects simultaneously, prioritizing tasks and meeting deadlines effectively.

Customer Service Associate - *Amazon*

Resolved customer inquiries with high satisfaction ratings, applying problem-solving skills and technical knowledge

Key Projects

- *Skin Lesion Detection:* Developed a deep learning-based model for skin lesion classification, leveraging multiple architectures including CNN, ResNet, InceptionV3, and VGG16 to achieve high accuracy in detecting and categorizing lesions.
- *Customer Lifetime Value Prediction:* Applied Random Forest Regression to predict customer lifetime value, leveraging advanced statistical techniques.
- *Self-Driving Car Simulation:* Built a neural network model using OpenCV and TensorFlow for self-driving simulations, tested in an open-source simulator.

Technical Skills

- Programming Languages: Python, C
- AI/ML/DL: TensorFlow, PyTorch, scikit-learn, XGBoost, Machine Learning
- Data Science: Data Preparation, Data Cleansing, Feature Engineering
- UI/UX Development: HTML, CSS, Front-end Development
- NLP: Text Classification, Sentiment Analysis, Language Modeling
- Frameworks: Python (Django)
- OOP: Object-Oriented Programming
- Software Tools: Microsoft Word, Excel, PowerPoint, Canva

Certifications

- Machine Learning Training Program- Acmegrade
- Workshop on AI Tools- Be10x
- HTML Essential Training- Linkedin Learning
- Full Stack and Front-End Web Development Course- Linkedin Learning
