RITKAAR SINGH

ritkaar.singh30@gmail.com 9999678911 New Delhi, West Delhi Ritkaar Singh Razzboy30

Profile

Highly motivated professional with a strong foundation in both **data science** and **full-stack web development**, specializing in the **MERN stack**. Passionate about creating **data-driven solutions** and building **responsive, scalable web applications**. Proficient in **data analysis, machine learning, and deep learning**, alongside expertise in **JavaScript**, **React**, **Node.js**, **Express**, and **MongoDB**. Demonstrates a solid understanding of programming principles and full-stack development, with a proven ability to adapt to new technologies. Eager to leverage a diverse skill set to deliver innovative and impactful solutions.

Education

B.Tech Artificial Intelligence & Data Science 2021 – 2025
Guru Tegh Bahadur Institute Of Technology, Hari Nagar New Delhi

Senior Secondary 2021
Guru Harkrishan Public School, Vasant Vihar New Delhi

Skills

Technical Skills

- **Data Analysis & Machine Learning**: Python, Pandas, NumPy, Scikit-Learn, TensorFlow, xgboost
- **Full Stack Development**: HTML5, CSS3, JavaScript (ES6+), React.js, Node.js, Express.js, RESTful Services, MongoDB
- **Developer Tools**: Git, GitHub, Visual Studio Code, Jupyter Notebook, AWS
- **Other**: RESTful API development, Responsive Design, Database Design, Statistical Analysis

Soft Skills

Analytical and Problem-Solving, Attention to Detail and Accuracy, Effective Communication, Team Collaboration in Agile Environments, Adaptability, Critical Thinking, Empathy

Projects

Recipe Generator

- Built a full-stack recipe generator using React, Node.js, and Gemini API.
- Implemented real-time streaming for dynamic recipe generation.
- Designed a responsive UI for seamless desktop and mobile use.
- Developed a scalable backend with API integration and error handling.

Email Spam Classification

- Developed a Naive Bayes spam classifier for 5,574 SMS messages with 0.99 F1-Score.
- Preprocessed text data using tokenization and feature extraction techniques.
- Conducted EDA to analyze data distributions and improve model performance.
- Optimized model performance with evaluation metrics and hyperparameter tuning.

Habit Stats

- Built a MERN stack habit tracker with interactive habit management and tracking features.
- Implemented secure JWT-based authentication for user sessions.
- Designed responsive UI with Tailwind CSS, including interactive calendars and habit stats.
- Developed RESTful APIs for CRUD operations and habit tracking with robust error handling.

Training

MERN Stack Training
Ernst & Young
Gained hands-on experience in building full-stack web applications, focusing on React.js, Node.js, and MongoDB.

Python for Data Science and Machine Learning Bootcamp
Pierian Training
Acquired expertise in Python for machine learning, covering data preprocessing, visualization, and model evaluation.
