RIJUL BHAMBRY

New Delhi, India
+91 9818664285 rbhambry@gmail.com Rijul Bhambry

EDUCATION

Guru Gobind Singh Indraprastha University **2021 - Present**
Bachelor of Technology in Artificial Intelligence & Data Science (CGPA of 9.058) *New Delhi, India*

Delhi Public School Rohini **2020 - 2021**
Class 12 (CBSE Score: 94.2%) *New Delhi, India*
Subjects - Physics, Chemistry, Maths, Computer Science & English

Delhi Public School Rohini **2018 - 2019**
Class 10 (CBSE Score: 95.5%) *New Delhi, India*
Subjects- English, Science, Maths, Social Science, Hindi & Foundation of Information Technology

EXPERIENCE

Delhi Metro Rail Corporation **July 2024 - August 2024**
Intern *New Delhi, India*

- Cleaned and pre-processed the Sentiment140 dataset, which comprises of approximately 1.6 million tweets, using natural language processing techniques such as **tokenization**, **stop-word removal**, and **lemmatization**.
- Utilized libraries such as **Pandas**, **NumPy**, **NLTK**, **BeautifulSoup**, **RegEx** and **scikit-learn** for data manipulation, text processing, and model development.
- Evaluated and compared different models to determine the best-performing one for analyzing the sentiment of tweets related to Delhi Metro, providing insights into public opinion and feedback.

PROJECTS

Music Recommendation System | *Python, NumPy, Pandas, sklearn*

- Developed a recommendation engine using the **K-Means** algorithm, suggesting songs based on the input song provided.
- Implemented techniques like **data cleaning** and **data normalization.**

IBM Data Science Capstone | *Python, NumPy, Pandas, sklearn, SQL, Matplotlib, Seaborn*

- Conducted an analysis of SpaceX's Falcon 9 launch data and applied **Exploratory Data Analysis (EDA)** techniques to derive meaningful insights.
- Identified correlations between various rocket variables and the success rate of landings, and determined optimal conditions for achieving the most favorable outcomes.

SKILLS

Languages: Python, SQL
Libraries: NumPy, Pandas, Matplotlib, Seaborn, Sklearn

COURSES

IBM Data Science Specialization | **October 2023**

- Developed foundational data science skills in Python programming, data visualization, data management, data cleaning, data analysis and machine learning.
- Learned to use popular data science tools and libraries, including **Jupyter Notebooks, Pandas, NumPy, and Scikit-Learn.**
- Completed hands-on projects to apply data science skills to real-world data sets.

CO-CURRICULAR ACTIVITIES

- Member of the school football team and the chess team at the zonal level.
- Scholar 2018 - 2019.
- Participated in multiple MUNs and debate competitions.
