EDUCATION

BTECH in Artificial Intelligence & Machine Learning **Current CGPA: 8.95**
Guru Tegh Bahadur Institute of Technology | GGSIPU Grad: 2021 - 2025 | Delhi, India

Central Board of Secondary Education **Class 10th (2019): 91%**
MR Vivekananda Model School | Grad: April 2021 | Delhi, India **Class 12th (2021): 86%**

WORK EXPERIENCE

Flutter Developer Intern | Wayug Infotech Solutions Pvt Ltd **April 2024 - Present**

- Designed and developed three mobile applications using Flutter, integrating RESTful APIs to enable seamless data exchange and enhance app functionality.
- Used Firebase to implement user authentication and manage over 10,000 records in real-time databases for faster and secure data access.
- Collaborated with cross-functional teams to design, test, and refine features, improving user retention by 20% through enhanced UI/UX.

App Dev Team Member | Google Developer Students Club, GTBIT **Dec 2023 - Oct 2024**

- Participated in the development and enhancement of two mobile applications using the Flutter framework, contributing to scalable and user-focused designs.
- Actively participated in 10+ workshops and hackathons, enhancing expertise in Flutter and teamwork.
- Collaborated with developers to ensure timely project delivery, improving completion speed by 15%.

Machine Learning Intern | CodSoft **Aug 2023 – Sep 2023**

- ·Developed machine learning models for Spam SMS Detection, Credit Card Fraud Detection, and Customer Churn Prediction, achieving 92%+ accuracy and saving clients an estimated $50,000 annually in fraud-related losses.
- Optimized models, reducing processing time by 30% and improving efficiency in handling large-scale data for real-world business applications.

PROJECTS

- **finDynamiQ - Money Management App**
  - ·Languages Used – Dart
  - ·Software Used – Android studio
  - ·Developed a Flutter-based app for tracking income and expenses across 10+ customizable categories, logging over 5,000 transactions during testing, with features such as advanced filters (date, month, year, custom range), visualized insights through graphs and pie charts, and the ability to export data to CSV/Excel for streamlined financial record-keeping.
- **INDIA DETOUR**
  - Languages Used – HTML, CSS, JAVASCRIPT
  - ·Software Used – VS Code
  - ·Developed a website to provide users with immersive and interactive experiences, showcasing 20+ popular landmarks, attractions, and personalized recommendations.
- **SIGN IT UP**
  - Languages Used: Python
  - Software Used: VS Code
  - Built and optimized a machine learning model for real-time sign language detection with 85% accuracy, processing inputs in under 200ms to enable effective communication for the hearing impaired.

TECHNICAL SKILLS

- **Languages and Libraries:** Dart, Python, Java, Flutter, OpenCV, Keras, Pandas, NumPy, Scikit-learn, NLP & Matplotlib
- **Tools and Frameworks:** Firebase, RESTful APIs, Android Studio, Git/GitHub, VS Code

ACHIEVEMENTS

- Best Wie (Women In Engineering) Team in Vihaan 6.O DTU Hackathon organized by IEEE DTU.
- Secured position in Top 15 Teams in Hack Unicorn Hackathon organized by GDSC, GTBIT.
- Winners of social cause track in Lean In Hacks 5.O IGDTUW Hackathon held at Microsoft Office, Noida.
