Upanshu Jha

New Delhi, India
+91 9315223937 Upanshujha@gmail.com Upanshu Jha

Education

Guru Gobind Singh Indraprastha University **2021 - Present**
Bachelor of Technology in C.S.E(Artificial Intelligence and Data Science)(CGPA of 9.1) *New Delhi, India*

Senior Secondry **2019 - 2021**
Class 12(CBSE : 87 percent) *New Delhi, India*

Projects

Intellimetro: Smart Monitoring System | *YOLO, Face Recognition* | Clickable Link

- IntelliMetro: Smart Monitoring System, a metro surveillance application using YOLOv3 and face recognition to monitor coach occupancy and identify persons of interest, enhancing safety and operational efficiency.
- Developed an intuitive Streamlit application, enabling seamless video analysis, criminal identification, and dynamic updates to the monitoring database.

Movie Recommendation System | *Scikit Learn, Matplotlib* | Clickable Link

- Developed a recommendation engine using the TF-IDF vectorizor, K-Means algorithm, suggesting movie based on the input genre and keyword extracted from the movies
- Implemented advance NLP techniques like TF-IDF vectorizor, Cosine Similarity etc

Customer Churn Analysis | *Python, Pandas, Seaborn, Scikit-Learn* | Clickable Link

- Predicted the churn rate of any new or existing Customer using Machine Learning Model. Used feature selection mechanisms such as chi-square to choose most relevant attributes and other EDA techniques.
- Utilized data visualization to gain deeper insights into customer behavior patterns and to present findings effectively. Performed Model Evaluation to select required model

Predictive Analytics for Rocket Booster Landing | *Scikit Learn, Plotly, SQL* | Clickable Link

- Performed an analysis of SpaceX's Falcon 9 launch data, applying Exploratory Data Analysis (EDA) techniques to extract and interpret key insights.
- Discovered correlations between key rocket variables and landing success rates, identifying the optimal conditions to achieve the most favorable outcomes.

Technical Skills

* Languages: Python, SQL
* Subject Knowledge: Data Science, Artificial Intelligence and Machine Learning, Deep Learning
* Libraries and Frameworks: Pandas, Numpy, Matplotlib, Seaborn, Scikit learn, Keras, PyTorch
* Tools: Version Control

Certifications

* IBM Data Science Professional Certificate Verify
* Stanford Machine Learning Specialization Verify
* Udacity Version Control Certification

Achievements

* Hackathon : Participated in CodSoft 4.0 and Smart IndiaHackathon
* Zonal Football Winner - Consecutively for 2 Years
* Top 10k in world in both SQL and Python on HackerRank
