Experience

Inept Studio, *Graphic Designer Intern* | Delhi *Jan 2022 - July2022*

- Created detailed 3D models for various projects including characters, environments, and props.
- Set up and execute high-quality renders using Blender's Cycles or Eevee rendering engines.
- Work closely with other team members such as designers, animators, and developers.

GDSC, UI/UX Developer |Delhi

- Develop and maintain design systems and component libraries in Figma. May2023-July2023
- Create 3D models and assets for use in UI designs and interactive elements.
- Render high-quality 3D assets and ensure they are optimized for web and mobile platforms.

Projects

Home Rental Application

Personal Project

- Designed and developed a comprehensive **MERN** (MongoDB, Express.js, React.js, Node.js) application for home/house renting, incorporating essential features like user **authentication , listing management, and booking functionality .**
- Utilized **Redux** and **Redux Persist** for efficient state management and data persistence, ensuring seamless user experiences across sessions.
- Implemented file upload capabilities using **Multer middleware**, allowing users to upload images and documents for their property listings.
- Enhanced user interaction and accessibility by integrating **React Date Range** for intuitive booking date selections and **React Beautiful DND** for drag-and-drop interactions.

Netflix-GPT

Personal Project

- Developed a clone website of **Netflix** and implemented search functionality for Movie recommendation using OpenAI(GPT-3.5 turbo).
- Developed a Netflix clone using **React JS**, leveraging **Redux** , **React-Router** for enhanced functionality and **state management**
- Utilized **TMDB API** for movies data base and **OpenAI GPT API** for movies recommendation
- used **Firebase** for user **Authorization** and for providing a **Backend** to website

YouTube Clone

Personal Project

- Developed a YouTube clone with a focus on optimizing performance and user experience.
- Implemented a sophisticated YouTube search feature.
- Utilized debouncing techniques to enhance website performance by minimizing API calls.
- Engineered a live chat box feature for real-time user interaction.Implemented delimiters to prevent crashes and ensure smooth website operation.

Course Filter Application

Personal Project

- Developed a Course filter static web application having **React Tostify** for like and unlike the course and a **filter bar** with categories sorting.

Skills

Languages : C/C++ , SQL , Python
Frameworks : React-JS , React-Native
Libraries : Redux , Redux-Persist , React-Router
Dev Tools : Git , Git Hub , Vercel

Education

7.93/10 **BTech in Artificial intelligence& Data Science**, *Guru Tegh Bahadur Institute of Technology* | Delhi, India *2021-25*

CBSE 12th Standard, *Brahma Shakti Public School* | Delhi , India *2019-21*

Courses: Data Structures and Algorithms with C++ | Introduction to Data Analytics
