Academic qualifications

Course	College/School/University	Year of Passing	Marks Obtained
B-Tech Artificial Intelligence and Machine Learning	Guru Tegh Bahadur Institute of Technology Guru Gobind Singh Indraprastha University , New Delhi (Year of Joining - 2021)	2025 (Expected)	89.0 %
12th Class	St. Martin Dioceasn School, New Delhi	2021	85.2 %
10thClass	St. Martin Dioceasn School, New Delhi	2019	82.8 %

Internships

- **Corrosion Intelligence, Software Developer Intern** 10/2023-12/2023
  - Developed AI/ML solutions using Python, contributing to team projects and enhancing problem-solving skills.
  - Created a Real-time Face Alignment Monitor using Haar Cascade Classifier for precise face detection in live video, displaying real-time alignment errors visually.
  - Built an Attribute Type & Graph Selection App to streamline data analysis with CSV uploads, visualizations using Plotly Express, and instant dashboard creation.
- **Personifwy, Data Science Intern, Internship** 07/2023-08/2023
  Completed a 2-month internship with Personifwy's Data Science Program, gaining practical experience in data analysis and machine learning. Gained hands-on experience in Python, various machine learning models.

Skills

- Languages: Python, C++
- Data Science & Machine Learning : NLP, Deep learning, Machine learning algorithms and techniques.
- Deep Learning Frameworks**:** TensorFlow, Keras
- Data Analysis & Visualization : NumPy, Pandas, Matplotlib, Seaborn
- Databases: SQL(MySQL) , XAMPP

Projects

- **Multiple Disease Predictor | Practicum Project**
  Tech Stack : Python, Scikit-learn, Pandas, NumPy, Matplotlib, UCI Machine Learning Repository

  Developed ML-based tool to detect multiple diseases simultaneously. Leveraged Logistic Regression & SVM algorithms for superior accuracy. Trained on diverse datasets like UCI heart disease, PIMA diabetes, and Parkinson's.
- **Custom Object Detection Dataset Project | ADL Project**
  Tech Stack : Python, TensorFlow, Keras, OpenCV, Faster R-CNN, MakeSense.ai, Matplotlib, NumPy

  Compiled 80 high-resolution images of dogs, jellyfish, raccoons, and otters with detailed bounding box annotations using MakeSense.ai. Supports wildlife monitoring and underwater species identification using CNN and R-CNN models. Used Faster R-CNN for precise object detection and localization.

Professional Certifications

- Microsoft Certified Azure Data Fundamentals 29/07/2023
  Issued by Microsoft
- Data Science with Python, Training 05/2023-06/2023
  Issued by Coincent
- Sensors and Simulators for UAS , Training Certificate 09/2023-09/2023
  Issued by Center for development of Advance Computing - CDAC

Extracurricular Activities

- Candidate for Interuniversity Shot-put, representing GTBIT in IPU's sports competition 2022-2024
- Attended 5- Day Boothcamp Training Program on “Sensors and Simulators for UAS” ,by CDAC 2023
- Captain of the Volleyball team and participant in the Football team led the team to victory in both intercollege volleyball and football matches 2024
