PROFESSIONAL SUMMARY

A dedicated student with a passion for technology, seeking to apply strong analytical and problem-solving skills to contribute effectively within a dynamic organization. Focused on continuous learning and professional growth.

EDUCATION

B.Tech (CGPA: 8.994) **2021-2025**
Guru Tegh Bahadur Institute of Technology New Delhi,India

XII (CBSE, Percentage :90.2) **2020**
MDH International School New Delhi,India

TECHNICAL SKILLS

Languages | Python, HTML, CSS, C++, SQL
Libraries | Pandas, NumPy, Matplotlib, Bootstrap, TensorFlow, React
Developer Tools | Git, Visual Studio Code, PyCharm, Eclipse

PROJECTS

1. Laptop Price Prediction | Python, Scikit-Learn, Streamlit

1. **Goal**: Predicted laptop prices based on features like CPU, company, SSD, HDD, RAM, and resolution.
2. **Data Preparation**: Preprocessed dataset with feature scaling to optimize model performance.
3. **Model Training**: Developed and saved the prediction model, which achieved 88% accuracy for reliable predictions.
4. **Web Application**: Created an interactive Streamlit web app to facilitate user interaction with the model.
5. **Deployment**: Successfully deployed the app on Render, making it accessible for practical use.

2. Real-Time Safety Gear Detection for Workplace Safety Enhancement | Python, YOLOv8, Matplotlib

1. **Goal**: Enhance workplace safety by detecting safety gear in real-time using YOLOv8.

2. **Data Preparation**: Collected and annotated a diverse dataset of images showing individuals with and without safety gear.

3. **Model Training**: Trained a YOLOv8 model on the annotated data to achieve accurate detection of safety gear.

4. **Real-Time Application**: Implemented the model for continuous monitoring of safety gear usage.

5. **Results**: Achieved high detection accuracy and developed an alert system for non-compliance with safety gear requirements.

3. Blockchain-Based Voting System | MERN Stack, MetaMask, Ganache

1. **Goal:** Developed a secure, decentralized voting platform to ensure transparency and integrity in elections.

2. **Collaboration:** Collaborated with three team members (team of four including myself) to design and implement the application.
3. **Technology Stack:** Built using the MERN stack, integrated with MetaMask for user authentication, and utilized Ganache for testing blockchain functionality.
4. **Features:** Implemented features such as voter registration, candidate selection, and vote recording on the blockchain.

INDUSTRIAL TRAINING

MERN Stack Development |Attended a 13-day training session organized by Edunet and EY.
Skills Gained | Acquired knowledge on full-stack development and learned the basics of MongoDB, Express.js, React.js, and Node.js.
Soft Skills | Developed key soft skills such as effective communication, teamwork, and time management.

SOFT SKILLS

Strong Analytical Skills | Proven abilities in problem solving .
Effective Communication | Strong verbal and written skills; proficient in technical documentation.
High Sense of Ownership | Self-starter and dedicated team player, committed to delivering on challenging deadlines with a positive, professional attitude.
Collaborative and Team Player | Strong collaborator, working effectively within teams to achieve common goals.
