Sukrati Sharma

sukrati.12sharma@gmail.com | +918287350701 | Vasundhara, Delhi-NCR, 201012
https://www.linkedin.com/in/sukratisharma/ | https://github.com/sukratis

EDUCATION

Guru Tegh Bahadur Institute of Technology | B.Tech, Artificial Intelligence and Data Science | GPA- 9.32/10 — **Expected July '25**, **Delhi, India**
Relevant course work: Machine learning, Data Science, Probability & statistics, Operating Systems, Cloud Computing, Computer Organization & Architecture, Computer Networks & Internet Protocols, Software Engineering, Computational Methods

St. Xavier's Senior Secondary School | XIIth , CBSE | Percentage – 95.6/100 — **July '19 – July '21**, **Delhi, India**
Subjects: Physics, Chemistry, Maths, Computer Science

PROFESSIONAL EXPERIENCE

iHUB DivyaSampark, IIT Roorkee & Diginique TechLabs | *Summer Intern* — **Jul '24 – Aug'24**, **Remote**
- Built a **Movie Recommendation System** leveraging collaborative and content-based filtering, and SVD for improved accuracy.
- Optimized scalability and addressed data sparsity challenges using advanced preprocessing and model refinement techniques.
- Developed an intuitive web interface for seamless deployment and user interaction.

OZIBOOK TECH SOLUTIOS PVT. LTD. | *Data Analyst Intern* — **Oct '23 – Dec '23**, **Remote**
- Collaborated with clients as a team lead to understand their data requirements and deliver customized data solutions.
- Employed web scraping techniques using BeautifulSoup and Selenium to extract and process data.
- Developed interactive data visualizations using Tableau and Power BI.

CODSOFT | *Data Science Intern* — **Aug '23**, **Remote**
- Developed and implemented data visualization strategies using Matplotlib and Seaborn to provide actionable insights.
- Utilized Pandas for efficient data manipulation and NumPy for numerical computing.
- Applied machine learning algorithms for predictive analysis and model building.

PROJECTS

PIPELINE EMOTION DETECTION (https://github.com/sukratis/pipeline-emotion-detection)
- Developed a machine learning pipeline for text-based emotion detection using Python, NLP, and scikit-learn.
- Implemented data preprocessing, feature engineering, and model training for accurate classification of emotions in textual data.
- Utilized NLTK, Pandas, and Matplotlib to handle data processing and visualization.

OLYMPIC DATA ANALYTICS WEB APP (https://github.com/sukratis/Olympic-data-analytics-web-app)
- Designed and deployed an interactive Olympic Data Analytics Web App using Python, Streamlit, and Pandas to analyze and visualize 120 years of Olympic Games data.
- Integrated dynamic visualizations with Plotly, created insightful trends on athlete performances and country statistics, and deployed the application on Heroku, enabling real-time data exploration for end-users.

BOLLYWOOD CELEBRITY LOOK-ALIKE FINDER (https://github.com/sukratis/Bollywood-celebrity-look-alike-finder)
- Developed a web application using Python and Streamlit that employs deep learning models and OpenCV for facial recognition to identify users' Bollywood celebrity look-alikes.
- Implemented image processing techniques and feature extraction algorithms to compare user photos against a comprehensive celebrity database, delivering real-time results.

SKILLS

Technical skills: Python | XML | JSON | HTML| C++ | Java | NumPy | SciPy | Pandas | Scikit-learn | BeautifulSoup | Selenium | Scrapy
Database skills: MySQL | SQLite | MongoDB **Data Visualization:** Matplotlib | Seaborn | Plotly | Tableau | PowerBI
Big data skills: Hadoop | Spark **Other skills:** Problem solving | Teamwork | Analytical thinking | Strong communication

EXTRA CURRICULAR AND CERTIFICATIONS

Goldman Sachs Software Engineering Virtual Experience Program on Forage - July 2024
- Completed a job simulation as a Goldman Sachs governance analyst responsible for assessing IT security and suggesting improvements.
- Identified that the company was using an outdated password hashing algorithm by cracking passwords using Hashcat.
- Wrote a memo for my supervisor summarizing a range of proposed uplifts to increase the company's level of password protection including extending minimum password length and using a dedicated hashing algorithm.
