Education

Degree/Certificate	Institute/Board	CGPA/Percentage	Year
B.Tech. (AI-DS)	Guru Teg Bahadur Institute of Technology, Delhi	9.16	2021-2025
Senior Secondary	CBSE Board	94.8%	2020-2021
Secondary	CBSE Board	92.2%	2018-2019

Experience

- **Onelogica** *July 2024 - September 2024*
  Data Science Intern Noida, India
  – Developed advanced chatbot solutions with Microsoft Bot Framework and Python; optimized automated task handling by reducing response time from 10 minutes to under one minute for frequently asked questions.
  – Mastered Python development expertise by building 3+ scalable solutions that integrated with multiple APIs, resulting in a 30% increase in automation efficiency and reducing manual processes by 25%.
- **Oriental Consultants Global Co. Ltd.** *August 2023 - October 2023*
  Data Science and Machine Learning Intern Surat, India
  – Applied data science to optimize the Mumbai-Ahmedabad Bullet Train's performance, increasing efficiency by 20%.
  – Anticipated potential failures, analyzed routes and schedules to reduce travel time and introduced a predictive maintenance system to reduce downtime and costs by 25%.

Projects

- **OpenAI and Google Gemini Whatsapp Bot using Python** *June 2024*
  – Created a WhatsApp chatbot using Flask and Twilio, integrating OpenAI & Google Gemini models to handle and respond to over 1,000 messages daily, improving user engagement by 30%.
  – Set up Flask web server to handle incoming requests from Twilio, resulting in a 40% improvement in message processing efficiency and response time.
  – Deployed Ngrok to expose Flask server to internet for real-time message handling, reducing response time by 40%.
- **Delhi Based Religious Sites Recommendation System and Telegram Bot** *May 2024*
  – Developed a recommendation system suggesting religious sites in Delhi based on user visit history, increasing user engagement by 25% and repeat visits by 20%.
  – Scraped data using Selenium from Wikipedia on 100+ religious sites in Delhi, preprocessing it to build a recommendation function, improving recommendation accuracy by 30%.
  – Integrated the system into a custom Telegram bot and websites, delivering tailored recommendations that boosted user satisfaction ratings by 30%
- **Customer Journey Mapping using Machine Learning (For The Souled Store)** *February 2024*
  – Collaborated with a UX researcher to analyze customer journeys by conducting over 200+ surveys.
  – Cleaned and visualized the data using Matplotlib and Seaborn, creating insightful charts that led to a 30% improvement in understanding customer behavior and exit points.
  – Predicted customer churn with Logistic Regression, increasing retention by 25%, and created a PowerBI dashboard.

Technical Skills

- **Programming Languages:** Python, SQL, HTML+CSS+JavaScript(Beginner)
- **Tools:** Git, Jupyter Notebook, Google Colab, Visual Studio, Windows, PowerBI, Excel, Tableau, PowerPoint
- **Technologies/Frameworks:** Pandas, Numpy, scikit-learn, NLTK, Seaborn, Matplotlib, OpenCV, Flask, Azure
- **Areas of Interest:** Data Analytics, Data Science, Machine Learning, Deep Learning, Generative AI, Chatbot Development

Certifications

- **British Airways (Forage) Certification** in Data Science
- **DUCAT Certification** in Artificial Intelligence, Machine Learning and Data Science
- **Great Learning Certification** in Data Science with Python, Crash Course in Data Science, Microsoft Azure Essentials

Leadership/Achievements

- Consistently ranked among the top students in the branch with an average CGPA of 9.16.
- Participated in 10+ hackathons, leading teams of 3-4 members to create impactful projects within 24 to 48-hour timeframes.
- Actively volunteered in a rural village, focusing on education for underprivileged children, organizing workshops that provided tutoring and mentoring to over 50 students, helping to improve their literacy and numeracy skills.
